

With our experience providing ShredGuard services to government offices and businesses throughout Atlantic Canada, ShredGuard will exceed your expectations. Although our prices are competitive, it is our service standards and technology processes that stand out as the true motivating factors to use our scheduled on-site shredding service. Please consider these points:

1. **Technology** – ShredGuard has invested heavily in the most technologically advanced shredding systems available called “closed loop technology. Closed loop shredding technology has several advantages:
 - Eliminates the possibility of your confidential documents being blown out of the shredding truck and into the public domain. This is very important to a company that holds sensitive client information such as yours. It would be devastating if your client trust is breached by the accidental loss of documents
 - For your security, ShredGuard’s complete fleet of trucks use closed loop technology.
2. **Security Level** – ShredGuard Shredding Technicians have achieved Reliability Status. You can be assured that your confidential material is safeguarded at all times by accredited Shredding Technicians trained to protect your privacy.
3. **Privacy** – Closed loop technology decreases the exposure of your confidential documents to external personnel. Our Shredding Technicians do not have to stand over a shredding hopper staring at your confidential papers get shredded as happens with the older technology. We both know how private and confidential this information is and it really should not be exposed to anyone outside of your employ.
4. **Service Standards** - Shred Guard is “AAA” rated NAID* designation. This designation assures our clients that they have employed a company that has passed the strict security and business audits befitting of the “AAA” designation. (*National Association of Information Destruction)
5. **Locally Based** – We are an Atlantic Canadian service company that has been providing service excellence to our clients for over 50 years.
6. **Customer Service** – ShredGuard’s mission is to build long-term relationships with our customers and we truly believe that the foundation of this mission is customer service. We stay in touch with our clients to ensure the service is being performed to their total satisfaction. Although security is our business, customer service is our soul... you shouldn’t have to settle for anything less!
